

Generative AI for Executives

Introduction

This course is presented as a series of short bitesized videos, each in their own lesson. The following is the first video, **Introducing Generative AI for Executives**.

The section after the video includes tips on course navigation and information about how to contact the training development team.

Topics are a revision of what has been covered in the previous 8 modules but not as comprehensive. Take the time to complete the Video Led-Training.

Topics coverage

- **Comparing Machine Learning, Deep Learning, and Generative AI**
- **Defining Foundation Models, Prompts, and Prompt Engineering**
- **Defining Tokens, Embeddings, Vectors, and Transformers**
- **Choosing a Foundation Model**
- **Using Your Own Data with a Foundation Model**
- **Choosing the Right AWS Service for Your Use Case**
- **Choosing Amazon SageMaker for Generative AI**
- **Choosing Amazon Bedrock for Generative AI**
